ECM 4 COMPLIANCE
WITH BOOM SOFTWARE

RAIL WORKSHOP PROVIDES SUPPORT FOR:

// Management of **customer inquiries and orders** for the maintenance of rail vehicles or their components

// Maintenance and implementation of **maintenance types** (preventive and corrective), as well as the related work processes, work plans, checklists, spare parts, tools and qualifications

// Management, planning and resource allocation of **vehicle parking** in accordance with customer order

// **Resource planning** according to ECM 2 maintenance requirements

// Graphic disposition and planning of vehicle parking on **track occupancy plans**

// Visualization of **work utilization and order progress** on a workshop monitor

// **Interfaces to measuring equipment** (e.g.: Calipri, Dr. Wehrhahn)

// Checklist-based **mobile order processing**

// Formal technical **operational release** of rail vehicles and handover of complete maintenance file

// **Dashboard and evaluation functionality** for workshop performance and control
